Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 03 January 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION*****Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

I. A system for redirecting optical signals comprising two reflective microstructure arrays formed on two different substrates and first and second pluralities of optical ports, wherein the first and second pluralities of optical ports are positioned on a first side of a free space, and the two substrates are positioned on a second side of a free space opposite the first side (see fig. 4A).

II. A system for redirecting optical signals comprising two reflective microstructure arrays formed on two different substrates and first and second pluralities of optical ports, wherein the first plurality of optical ports and one substrate are positioned on a first side of a free space, and the second plurality of optical ports and the other substrate are positioned on a second side of a free space opposite the first side (see fig. 5A).

III. A system for redirecting optical signals comprising two reflective microstructure arrays formed on two different substrates and first and second pluralities of optical ports, wherein the first and second optical ports and two substrates are positioned on respective sides of a polyhedral free space (see fig. 6A).

IV. A system for redirecting optical signals comprising one reflective microstructure arrays formed on one substrate, originating and target optical ports, and a fixed reflective surface (see fig. 7).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-4, 8-11, 19-32, 46, and 56-57 are generic. Furthermore, it

Art Unit: 2877

appears that claims 33-39 are directed to species I, claims 40-43 are directed to species II, and claims 15, and 44-45 are directed to species III.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Examiner has placed the restriction in an Office Action, instead of calling applicant, in order to help clarify the restriction requirement.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
